B.1.1 Inngangur

Í þessum viðauka er markaðshlutdeild þeirra eldsneytissala sem selja bifreiðaeldsneyti í smásölu á eldsneytisstöðvum metin. Notast er við skilgreiningar á landfræðilegum mörkuðum sem finna má í kafla 3.7 í frummatsskýrslunni. Til upplýsinga er einnig gefin upp hlutdeild einstakra eldsneytissala á landinu öllu og á afmörkuðum landfræðilegum svæðum.

B.1.2 Skilgreiningar

Smásala í þessum viðauka merkir sala bifreiðaeldsneytis á eldsneytisstöðvum og því er aðeins um hluta af heildarsmásölumarkaði eldsneytis að ræða. Í þessum kafla er því ekki tekin með sala olíufélaganna sem eldsneytið afhent er beint af olíuflutningabifreið eða beint af tanki.

Eftirfarandi skammstafanir má finna í umfjölluninni:

Allar tegundir:	Sala dísilolíu og 95 oktana bensíns.
B95:	95 oktana bensín.
AGO:	Dísilolía (lituð og ólituð)

B.1.3 Gögn

Aflað var gagna um árlega sölu (magn) hvers eldsneytisstöðvar hvers olúfélags fyrir sig á árunum 2005-2012 og þær upplýsingar nýttar til þess að reikna út markaðshlutdeild olúfélagana á viðkomandi landfræðilegum mörkuðum.

B.1.4 Allt landið

Yfir 300 milljón lítrar af bifreiðaeldsneyti voru seldir í smásölu á eldsneytisstöðvum á Íslandi á árinu 2012. Þar af var rúmlega helmingur seldur á höfuðborgarsvæðinu. Um [10 – 20]% var selt á Suðurnesjum og Norðurlandi, aðeins minna á Suðurlandi en önnur landsvæði voru með enn minni sölu. Hlutfallsleg skiptingu sölu eftir landsvæðum má sjá í töflu hér á eftir. Um [50 – 60]% af seldu magni var bensín en þónokkur munur er á því hvernig sala á bensíni og dísilolíu dreifðist um landið. Um [60 – 70]% af seldum bensínlítrum voru seldir á höfuðborgarsvæðinu en aðeins [40 – 50]% af seldum lítrum af dísilolíu. Hins vegar var sala á dísilolíu um 80% meiri en á sala bensíns á Vestfjörðum og 50% meiri á Vesturlandi.
